MANAGER – DATA PLATFORMS
Data Engineering & GenAI Strategy | GCP • BigQuery • Tableau • Prompt Engineering

Seasoned Data & BI leader with 15+ years delivering cloud-native analytics solutions and data-driven transformations. Proven ability to align data strategy with business objectives, leading cloud migrations, BI automation, and governance initiatives. Adept at integrating GenAI into analytics workflows to optimize performance and decision-making.

CORE SKILLS
GCP • BigQuery • SQL • Tableau • Power BI • Python • Data Governance • GenAI • Prompt Engineering • Workflow Automation • Agile Delivery • CXO Reporting • KPI Dashboards • Cloud Migration

---

KEY ACHIEVEMENTS

- **Cloud Migration to GCP** – Migrated on-prem MySQL database to Google Cloud, cutting ETL time from a full day to a few hours and improving data availability, enabling faster decision-making and reducing infrastructure costs by 30%.
- **Enterprise BI Transformation** – Streamlined ETL workflows and introduced summarized tables, reducing processing overhead by 40% and giving leadership quicker access to actionable insights.
- **KPI & Dashboard Frameworks** – Built Tableau-ready data sources across finance, channel, and marketing metrics, supporting executives with real-time visibility into revenue, budget, and campaign ROI.
- **Analytics Automation** – Developed reusable workflows to aggregate and summarize data from internal and vendor sources, improving reporting speed by 50% and cutting manual data prep time by several hours per week.
- **BI Application Development** – Created BI tools and custom reports to analyse legacy data, preserving historical insights that informed long-term business strategy.

- **Sales & Product Performance Dashboards** – Built interactive dashboards to track milestones, product launches, and promotional performance, driving targeted marketing actions that boosted campaign conversion rates.

PROFESSIONAL EXPERIENCE

Radix
Manager – Business Intelligence
Jul 2022 – Present

- Defined enterprise BI strategy aligned with OKRs, accelerating insight delivery by 20%
- Launched 4+ org-wide self-serve data products via cloud-native pipelines
