Abhijeet Bhowmick

Data Platform Lead | GCP & BigQuery | Cost Governance & AI-Assisted Delivery

Mumbai, India | Seeking international remote opportunities | bhowmick2021@gmail.com | linkedin.com/in/abhijeetbhowmick

SUMMARY

Hands-on data platform owner with 19+ years across technology, BI, and automation. Combines GCP/BigQuery expertise with cost governance, operational judgment, and stakeholder alignment.

SELECTED IMPACT

- Reduced normalized BigQuery costs by **15–30%** through query and workload governance and platform optimization (Aug 2025–Jan 2026).
- Approximately **95% reduction in runtime** for one Tableau extract view in a benchmark (BigQuery vs TimescaleDB, Jun 2026).

RECENT ACCOMPLISHMENTS: AI-ASSISTED DATA PLATFORM & GOVERNANCE DELIVERY

Designed, built and deployed a connected set of governance tools end to end. I own architecture, validation and rollout; GPT and Claude assist coding, debugging, tests and iteration, and I review every change.

- **GCP Governance Hub:** scheduled daily governance scans, with findings in an authenticated console.
- **Query Doctor VNext:** SQL analysis, formatting/highlighting and cost estimation; validated on stage before production deployment.
- **Atlas:** lineage, ownership and health visibility; catalogued data assets, production pilot.
- **Shared governance backend:** FastAPI service in Docker consolidating the tools; verified in staging and production, and supported operationally.

EXPERIENCE

Manager, Software Development Engineering (Data Science) | Jul 2022 – Present
Radix Web Services (Directi/Radix group) | Functional scope: Data & BI Platforms | Individual contributor, sole platform owner

- Set architecture, tooling and delivery standards for GCP/BigQuery analytics and run cost governance as sole operator.
- Find BigQuery cost drivers from usage metadata, then fix them at the source: query and workload tuning, partitioning, clustering and storage lifecycle, each fix itemized and dated so savings stay traceable; built a live dashboard and a pre-run query cost estimator so drivers surface early.
- Decided to serve very large Tableau extracts from a secondary TimescaleDB database instead of repeated heavy BigQuery reads; built it with a daily Airflow sync, atomic-transaction safety and Slack alerting (approximately 95% reduction in runtime for one Tableau extract view in a benchmark).
- Rebuilt the sync in 2026 (larger test suite, staged cutover) and diagnosed two production bugs on its first live run: a string-escaping bug that silently disabled incremental decompression, and a null-value validation bug that starved the job queue. Both fixed.
- Consolidated separate governance apps onto one shared FastAPI backend in Docker for simpler hosting and deployment, with a data-freshness API; verified in staging and production.
- Deploy and maintain every tool I build: changes are reviewed and tested by me, staged first, and released with documented validation and rollback checkpoints.
- Work with senior leadership and Product, Finance and Marketing stakeholders, communicating status and trade-offs clearly.

Sr. Lead – BI Tech | Jun 2020 – Jul 2022
Radix Web Solutions / Radix Web Services

- Legacy-to-GCP transformation: led the move from on-premises BI infrastructure to GCP/BigQuery, planning rollout, rollback and business-continuity checks for a zero-disruption cutover; lowered cost, improved availability and enabled self-serve analytics.

TECHNICAL SKILLS

Cloud and data: GCP, BigQuery, Cloud Composer/Airflow, Pub/Sub, TimescaleDB/PostgreSQL, Tableau

Engineering: SQL, Python, FastAPI, Docker/Compose, Git, Linux, n8n

Practice: FinOps and cost governance, data lineage and ownership, monitoring and alerting, documentation, staged releases and rollback

EARLIER EXPERIENCE

- **Radix / Directi group, 2009–2020:** Sr Team Lead – Application Development (2016–20); BI Team Lead (2015–16); Senior Analyst – BI, Directi (2012–15); BI & Development, LogicBoxes, built the LB360 analytics portal (2010–12); Business Operations Liaison (2009–10).
- **Mphasis (An HP Company)**, Specialist – Sr Technical Associate (2007–09); **Sutherland Global Services**, Technical Associate (2006–07).

EDUCATION AND CERTIFICATIONS

- **B.Com Coursework** | University of Mumbai
- **GNIIT Computer Diploma** | NIIT (2002–2004)
